

This certifies that

**Caleb Fellowes**

has completed the

## **An Introduction to Chest Radiographs eLearning Course**

During this eLearning course participants will be presented with the core components of a chest radiograph examination, and how common pathologies may present, and a structured approach for the review of a chest radiograph. Participants will work through a number of formative question and answer segments, which will provide them with the opportunity to review chest radiographs, then check their own findings against a model answer.
